Subject: RE: Water Gen MTA

Based on my discussions with Ed Russo and WaterGen, they have indicated that they have medium scale system in the states that can be most readily deployed to Cincinnati. That said, Ed has also indicated that Watergen has an interest in deploying a large scale system for testing. This will be a point of discussion during their visit this week. For now, my recommendation would be to list the medium sized system alone in the current version of the MTA; we can adjust later based on Watergen comments.

Subject: RE: Water Gen MTA

Hi Ardra, hi Mike!

The MTA looks good. When I provided you the draft, I included two systems – the medium system and the large – so please figure out which one will be delivered to the lab. Or will it be both??

That's the only edit I see to make. We'll give Water Gen a chance to comment. So please make the edit on the first page and send it to Zach Fenster and Ed Russo.

Subject: Water Gen MTA

Laura,

Attached is the draft MTA. My recommendation would be for WaterGen to review it before we send it our Lab Director for signature. I know you and Geoff have been meeting with the legal team at WaterGen. Did you want to forward this to them? If not, I'm happy send it to Yehuda, Ed Russo and Zack Fenster for vetting among their team. Just let me know.

Also, just an FYI, WaterGen representatives will be visiting the ORD/NERL lab in Cincinnati next week but will not be delivering any systems at that time. My understanding is that the WaterGen crew was already planning a trip to Michigan and the Cincinnati visit was a convenient time for them visit the lab and discuss the anticipated collaboration. Hopefully, this takes some pressure off of having a rush on the MTA.

Im planning to be on vacation most next week but will be checking emails periodically. In my absence, feel free to reach out to Mike Nye who I've copied on this email.

Best Regards,

Ardra Morgan
